Notes for Contributors to Kasetsart Journal of Social Sciences

Kasetsart Journal of Social Sciences is published by the Kasetsart University Research and Development Institute (KURDI) under the authorization of Kasetsart University to serve the interests of both Thai and international social scientists and researchers. The aim is to publish high quality research papers in various areas of social science, such as social and development studies, humanities, education and economics. The Journal is published as a periodical, with four issues annually in January, April, July, and October and is distributed both within Thailand and overseas.

Contributions to the Journal can be made as either a research article or a review article.

1. A research article presents new knowledge and issues discovered from **research** originally conducted by the authors.

2. A review article elaborates on particular matters grounded from scholarly analysis and synthesis, with accurate references, of a wide range of sources, including theories, concepts and research publications.

It will be assumed that submitted manuscripts have not been published elsewhere, and they are not currently being considered by another journal.

KJSS reserves the right not to publish the article by the same author (s) more than once within one year, so as to give other authors a chance to get published, and in order to maintain diversity of authors, topics, theories and methodology.

Responsibility for contents

Responsibility for contents are the authors. Reviewed manuscripts do not represent the opinion nor the responsibility of the editorial board and Kasetsart University.

Manuscript Preparation (English manuscript)

The Journal Editorial Board will consider submitted manuscripts prepared in accordance with the following instructions.

1. Manuscript. A double-spaced manuscript is required on A4 paper using 12-point Times New Roman. Each article must not exceed 18 typed pages.

2. Title. The title must be concise and precise to the content.

3. Author. The full name of each author is required.

4. Contact Details. The contact details for the corresponding author must be convenient for contact by Journal staff.

5. Abstract. An abstract must not exceed 250 words and must contain all key points in the article. No more than five keywords must be provided.

6. Content. Writing style of a **research article** should conform to the research methodology and tradition accepted for a given research philosophy/paradigm. The content comprises the following headings.

Introduction: Explain the research rationale justified by appropriate citations, objectives, research questions or hypotheses. A concise literature review may be included as appropriate.

Literature review: Elaborate on analysis of related literature and research to identify relevant concepts, theories and information that frame the research title.

To allow for writing flexibility, the content of the introduction and the literature review sections may be integrated to form a strong grounded introduction.

Research methodology: Identify data collection methods, duration and data analysis. The methods may be quantitative, qualitative, or mixed, as appropriate to the research purpose.

Research findings: Present the findings together with relevant supportive evidence revealed from the research, either in the forms of figures, tables or diagrams.

Conclusion and recommendations: Conclude the research with discussion/reflections and recommendations based on the research findings.

7. Figures and Tables. Figures and tables must be annotated as necessary and must be sequentially numbered. Figures must be clear and relevant to major points in the text. Photographs should be in black and white, with color used if necessary. The captions of figures and tables must be concise and precise.

8. References. References as cited in the text and under the reference list must be identical. A name: year system must be consistently used for references throughout the article. References and citations must follow the APA (American Psychological Association) style. A style template for the APA Seventh Edition is available in Microsoft Word 2007 and later versions.

Documents in the reference list must be ordered alphabetically without numbering - - See recent copies of the Journal for guidance.

The authors must be referred to by their family name followed by the capitalized initial letter of their first and any other middle names. Where the name has a common prefix such as Van, de, der and von, these words must be written in front of the family name. Honorifics should not be included.

9. Writing. Contributions to the journal should be written with clarity and precision. In addition, terms and abbreviations used should be consistent.

Review Process

The editorial board reserves the right to review each manuscript as appropriate. All manuscripts will be reviewed by at least two recognized peers. Authors will be informed by the editor of the reasons for any decision or requirement to revise the manuscript. Appropriate comments from reviewers and editors will be appended.

Time. From initial submission to publication normally takes approximately three months.

Before preparing your submission, please visit website for a style guide and contact details:
